

JOTUN

Topcoats

FOR SUPERIOR FINISHES

A topcoat is the finishing coating layer of a coating system. It plays an important role protecting the anticorrosive coating system while also beautifying your asset. Jotun's long experience and extensive testing have resulted in a wide range of topcoats suitable for different climatic conditions and usage areas.

PROLONGED DURABILITY

The topcoat protects the primer system, and hence prolongs the life time of the anticorrosive coating system.

PERFECT FINISH

Perfect finish on your asset is achieved through superior flow properties, a wide range of colors and various gloss levels.

PROVEN PERFORMANCE

Jotun has developed and supplied high performing topcoats for various climatic conditions worldwide for more than 90 years.

COLOUR AND GLOSS RETENTION

SELECTED TOPCOATS

Jotun's topcoats are tailor made for different usage situations and comprise various technologies. The Pilot product range represents products where high performance can be expected for a certain time period whereas the Hardtop product range are products where high performance can be expected for a longer period of time.

Hardtop | OPTIMA

Polysiloxane with excellent colour and gloss retention and an extremely tough paint film reducing maintenance need to a minimum. The topcoat is isocyanate free.

Hardtop | PRO

Polysiloxane with very good colour and gloss retention, and a tough paint film reducing maintenance need substantially.

Hardtop | ECO

A premium finish polyurethane with no solvents defined as HAPs and low VOC.

Hardtop | AX

Polyurethane with a robust finish, easily achieved by a hassle free application.

Hardtop | SMART PACK

Chemically curing modified acrylic tailor made for maintenance situations. 1:1 mixing ratio and excellent manual application properties.

Hardtop | XP

Polyurethane with an extensive worldwide track record for all-around use.

Pilot | WF

Water-borne acrylic that dries fast and has an excellent HSE-profile.

Pilot | ACR

Fast drying acrylic that can be used direct to metal.

Hardtop

OPTIMA

ULTRA LONG LASTING POLYSILOXANE PERFORMANCE

FEATURES

- Excellent colour and gloss retention
- Very good abrasion resistance
- Very good chemical resistance
- Isocyanate free

Maintenance of your asset can be very costly and time consuming, and hence should be reduced to a minimum. Some assets are difficult to maintain and should therefore be protected by an extremely durable paint system ensuring a very long life time.

The excellent colour and gloss retention of Hardtop Optima prolong the maintenance intervals to a maximum. Hardtop Optima satisfies the highest demand for extreme durability supported by very good abrasion and chemical resistance. The extreme durability combined with low VOC and no isocyanates make Hardtop Optima represent safety for the applicator and sustainability for the environment.

Hardtop

PRO

LONG LASTING POLYSILOXANE PERFORMANCE

The long-lasting polysiloxane performance of Hardtop Pro reduces maintenance of your asset substantially.

Hardtop Pro beautifies and protects your asset for a long time and in a sustainable way through its very good colour and gloss retention, superior chemical and abrasion resistance and by being isocyanate free. Excellent application properties by brush, roller and airless spray make Hardtop Pro the perfect choice for both new construction and maintenance projects in temperatures down to 0°C.

FEATURES

- Very good colour and gloss retention
- Very good abrasion resistance
- Very good chemical resistance
- Isocyanate free

Hardtop

ECO

THE PREFERRED POLYURETHANE FOR LEED® PROJECTS

FEATURES

- Low VOC
- No solvents defined as HAPs

Through the Jotun GreenSteps programme we develop sustainable solutions. Hardtop Eco is tailor made to reduce the impact on both the applicator and the environment. The topcoat contributes towards satisfying Credits IEQ and MR under LEED® 2009 and EQ and MR under LEED® v4, and contains no solvents defined as HAPs.

Good colour and gloss retention combined with very good dirt pick-up resistance ensure a premium finish on your asset.

Hardtop | AX

ROBUST FINISH – MADE EASY

Unstable climatic conditions and the competence of the applicator can influence the overall performance of a topcoat unfavourably. Hardtop AX is developed to secure a hassle free application despite challenging application situations.

Hardtop AX also ensures a robust and premium finish due to very good colour and gloss retention, chemical and abrasion resistance and good application properties by airless spray, brush and roller.

FEATURES

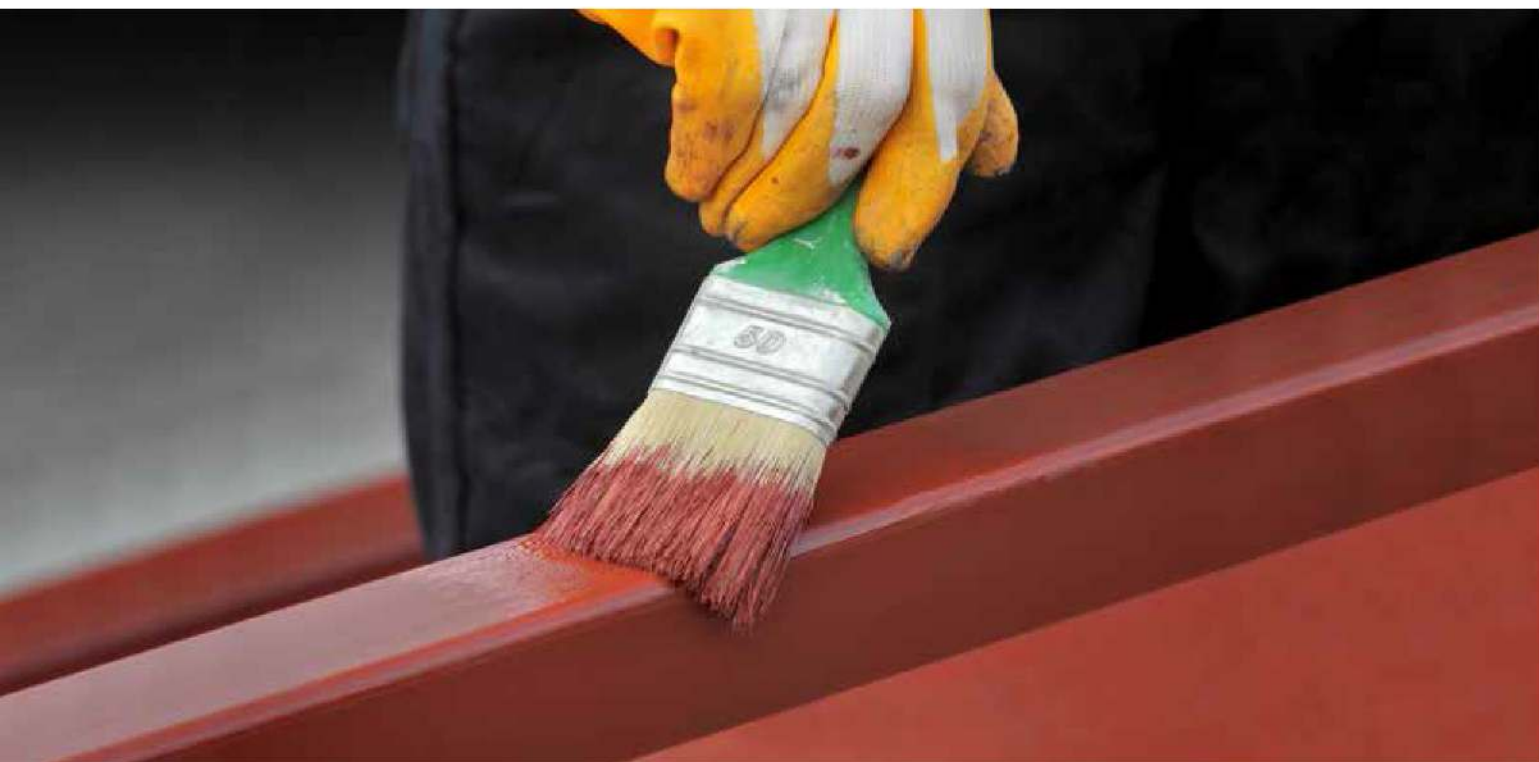

- Very good colour and gloss retention
- Very good application properties by airless spray
- Very good chemical resistance
- Very good abrasion resistance

Hardtop

SMART PACK

SIMPLICITY IN MAINTENANCE SITUATIONS

FEATURES

- Very good application properties by brush and roller
- Isocyanate free
- 1:1 mixing ratio

Keeping your asset in good condition is a continuous and important task. Hardtop Smart Pack is tailor made for maintenance situations.

The combination of long pot life and a simplified 1:1 mixing ratio enables you to mix correctly, and to mix only the amount needed. Hardtop Smart Pack is tailor made for application by brush and roller and can also be used direct to metal.

Hardtop

XP

CLASSIC POLYURETHANE PERFORMANCE

In the marine and protective coatings market, polyurethanes represent the largest generic type of two component chemically curing topcoats.

Hardtop XP provides you with classic polyurethane performance combined with good application properties. The topcoat protects and beautifies millions of square meters on assets across the world and has proven its performance over time.

FEATURES

- Classic polyurethane performance with very good application properties by airless spray

Pilot

WF

GREEN AND FAST

FEATURES

- Very low VOC
- Fast drying down to 10°C
- Safe

Through the Jotun GreenSteps programme we develop sustainable solutions. Our water-borne Pilot WF is tailor made to reduce the impact on both the applicator and the environment. This is ensured by very low VOC content and that Pilot WF contributes towards satisfying Credits IEQ and MR under LEED® 2009 and EQ and MR under LEED® v4. Pilot WF has very low VOC, minimizing the risk for explosions.

Pilot WF dries very fast supporting efficiency in your operations. The product is suitable for interior and exterior applications, and gives a very good finish when applied by brush, roller and airless spray.

Pilot

ACR

VERSATILE AND FAST

Pilot ACR is one of the most versatile paints in our topcoat portfolio. The product can be used as a topcoat in a corrosion protection system or direct to metal for less corrosive environments. Pilot ACR has a coat saving potential due to its high build- and direct to metal properties.

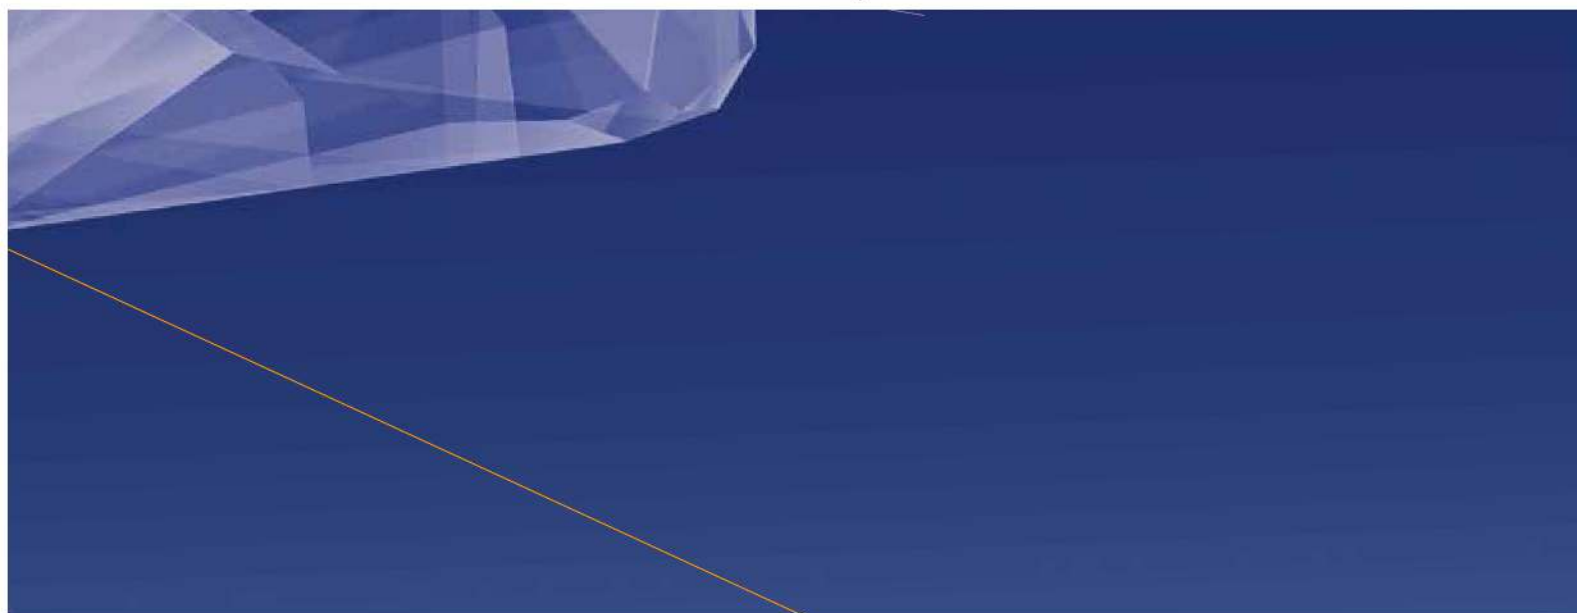

Pilot ACR dries fast down to -10°C , supporting efficiency in operations. The product is suitable for interior and exterior applications.

FEATURES

- Fast drying down to -10°C
- Direct to metal properties

A global provider of coatings

Jotun is one of the world's leading manufacturers of paints, coatings and powder coatings.

We have 65 companies in 45 countries and 35 production facilities in 21 countries on all continents, and are represented in more than 100 countries with our network of agents, branch offices, distributors and sales offices around the world.

Our operations cover development, production, marketing, R&D and sales of paints and coatings to protect and decorate surfaces in residential, shipping and industrial markets.

Jotun is organised in four segments and seven geographical regions with its head office located in Sandefjord, Norway.

PROTECTIVE COATINGS

Our protective coatings are protecting assets in industries such as offshore, energy, infrastructure and hydrocarbon processing.

MARINE COATINGS

As the world's leading provider of marine coatings we supply to ship owners, management companies and others for newbuilding, seastock and dry-dock.

POWDER COATINGS

Our powder coatings are supplied to manufacturers of appliances, furniture, building components, pipelines and general industries.

DECORATIVE PAINTS

Our interior and exterior paints are being used by consumers and professionals worldwide, for protection and decoration.

UNIFORM STANDARD ACROSS THE GLOBE

- Easy to exchange trained technical personnel across national borders and multi-national projects.
- Compulsory training for all technical and sales personnel in marine and protective segments. Most of our coating advisors and technical personnel have FROSIO and/or NACE certification.
- Same competence in maintaining company standard procedures globally.

Jotun GreenSteps

FOR A MORE COLOURFUL WORLD, WE ALL NEED TO BE A LITTLE GREENER

Jotun recognises the responsibility it has to the environment and has established its own GreenSteps programme.

Through the GreenSteps programme we address market demand for more sustainable coatings solutions.

Reducing VOC emissions

Reducing hazardous materials

Reducing energy consumption

Reducing carbon footprint

Reducing waste
